

THUNDER

Connection to your Weekend Escape

LITHIUM JUMP STARTER

**CHARGE YOUR
WEEKEND,
WHEREVER YOU ARE!**

THE THUNDER DIFFERENCE

**Thunder helps take you places you've never been, making
adventure more affordable and accessible than ever before!**

There's nothing quite like a simple escape; loading up the 4WD to head up the beach or through the bush for that ultimate camping spot.

But when life only allows you to make your perfect escape a few times a year, it's hard to justify the cost of high end specialist equipment. This is where Thunder comes in.

Thunder is designed for the working adventurer, providing high output products tested to handle anything you can throw at them, without breaking the bank.

The growing range of lights, switches, gauges and charging equipment is taking Australia by storm, with more products always on the horizon.

No matter your destination, Thunder will help get you where you need to go and back home again.

Visit thunderauto.com.au for more information.

CHARGE YOUR WEEKEND

Don't let a flat battery put a dampener on your next adventure; take charge and power your journey with the Thunder Jump Starter.

Designed to keep you on the road when you need to be, the Thunder Jump Starter is a high performance lithium battery capable of jump starting any lifeless car, multiple times.

Producing a massive 18,000mAh, Thunder Jump Starter has the ability to power your weekend over and over again, no matter your charging needs.

Using the Jump Starter is easy - simply connect the intelligent jumper cables, attach them to the correct battery terminals and turn on your car. It doesn't get much easier than that. Intelligent jumper cables prevent you from damaging your electrical system should you accidentally apply the wrong lead to the wrong battery terminal.

Charging your Jump Starter is just as simple, with options to charge through 240 volt mains power and 12 volt in-vehicle connections.

More than a compact device to revive your car, the Jump Starter also has the ability to charge your everyday mobile devices including laptops, tablets and smartphones. This allows you to stay in contact with the outside world when you're camping or to act as a secondary battery when it goes flat during regular use. Holding charge in storage for up to six months and recharged in under eight hours, the Thunder Jump Starter is a reliable companion for any car owner, regardless of size, model or potential for adventure.

Key Features

- High performance lithium charger.
- Jump start a 4 cylinder car up to 40 times with a single charge.
- Capable of successfully jump starting a V8 engine multiple times.
- Integrated flashlight helps you jump start at night or find the right tools.

PRODUCT INFORMATION

THUNDER JUMP STARTER	
Part No.	TDR02011
Size	230mm (L) x 87mm (W) x 20mm (H)
Weight	615g
Specifications	18,000mAh 600 CCA Peak
Available from	Battery World, leading automotive retailers and auto electrical specialists
Price	From \$320 RRP

Power your leading portable devices including smartphones, tablets and laptops.

Product Includes:
